Celebrite Cables

Celebrite cables are used to transfer phonebooks from 1 manufacturer's

phone to another manufacturer's phone.

Order cable CEL-9MOT to support the launch of the V60p. This cable is the same as the T300p cable.

How to Push to Talk

Getting Started

Customers can follow the steps below to create a Push to Talk contact list through the Internet.

Note: The customer must complete these steps to create a contact list. Once created via the web site, the contact list will automatically appear on the handset once the user power-cycles the device.

If the customer subscribes to the Vblock feature, it must be deactivated during the registration process

Access www.vzwpushtotalk.com from a desktop or laptop computer.

Click Create a User Profile (customer will be linked to vtext site) and enter the 10-digit mobile number.

Click Send. The system will validate the customer, as a Push to Talk customer if subscribed to Push to Talk, and the following message will display: *"Your password has been sent to your mobile device."* Enter the temporary password received by a text message. Create a new password. The password must be between 5-12 alphanumeric characters with no spaces (case sensitive).

Re-enter the password and click Save. Access www.vzwpushtotalk.com to log-in.

Push to Talk (PTT)	Making Push to Talk Calls	Receiving Push to Talk Calls
Push to Talk (PTT) is a two-way feature that allows you to talk directly with other VZW PTT users from your wireless phone Tip: On a PTT call, only one person can speak at a time. Once you have finished speaking, release the PTT button and listen for the other party to reply There are 4 ways to initiate a PTT call: 1. Select a recipient from PTT contact list 2. Enter a number via your keypad 3. Select a number from your dialed calls or received calls 4. Select a number from your phonebook list There are two types of PTT calls: 1. **Barge Calls** - let you call and then speak directly to the called individual 2. **Alert Calls** - inform the called individual of your incoming call.	**Barge Call:** 1. For calls from the contact list: Press and release the Push to Talk button. The contact list displays. 2. Scroll to highlight the person you wish to call 3. Press and hold the Push to Talk button. ..Connecting….displays 4. After the OK to talk tone and the "talking to" screen displays, you may begin speaking 5. Release the Push to Talk button when you are finished talking **Alert Call:** 1. For calls via the contact list: From the standby screen, press and release the Push to Talk button. The contact list displays 2. Scroll to highlight the person you wish to alert and press the left soft key (Alert) 3. Press and release the Push to Talk button. You will hear a tone indicating the Alert has been sent	When you receive a Push to Talk call, a tone sounds and the name of the caller is displayed **Barge Call:** 1. When an incoming Push to Talk Barge call is received, a tone is sent and the screen will display "Listening to" and the person's name 2. To Speak, press the Push to Talk button. "Talking to and the name of the person displays 3. Release the Push to Talk button, "Connected to" displays **Alert Call:** When an incoming Push to Talk Alert Call is received, an alert tone is heard and the screen will display incoming alert along with the person's name. 1. Press and hold the Push to Talk button within 20 seconds to talk. If you are unable to take the call, press the Ignore or End key. 2. When connected to the call, a tone sounds and "Talking to" and the name of the person displays. 3. When you release the Push to Talk button, "Connected to" displays. 4. "Listening to" displays when the other person is talking 5. Release the Push to Talk button when you are finished speaking
